EDUCATION

Master of Science, Computer Science

Iowa State University, Ames, Iowa, USA

August 2021 - December 2024

3.82/4.0

Bachelor of Technology, Information Technology

SRM Institute of Science and Technology, Chennai, Tamil Nadu, India

July 2014 - May 2018

9.40/10.0

TECHNICAL SKILLS SUMMARY

Languages:	Python, JavaScript, Java, Node.js, C#, .NET, VBA, React.js, Knockout.js, HTML, CSS, Bootstrap, BASH Shell Scripting
Databases:	SQL, Neo4j, MongoDB
Technologies/Frameworks:	BLAST, Power Automate, Power BI, Oracle Commerce, jQuery, RESTful API
Tools:	Eclipse, Jupyter, Atlassian JIRA, Postman, ServiceNow, VS Code, Git, Azure DevOps
Misc:	SDLC, Agile Methodologies, Windows, Linux, Web Development, CI/CD

PROFESSIONAL EXPERIENCE

Graduate Research Assistant, Iowa State University, Iowa, USA

August 2022 - Present

- Developed a web tool for Basic Local Alignment Search Tool (BLAST) for Porcine Reproductive and Respiratory Syndrome (PRRS) virus database to facilitate similar virus search by veterinarians.
- Automated data wrangling techniques using Python to pre-process data retrieved from multiple sources via SQL.
- Conducted monthly data analysis of genetic sequences to detect anomalies and provide insights to stakeholders for informed decision-making.
- Implemented a process to auto-update attributes of PRRSV genetic data in a database, reducing look-up time by 30%.
- Researching techniques for efficient classification and clustering of PRRS virus genetic data.

Software Development Intern, Syngenta, Iowa, USA

May 2024 - August 2024

- Developed and optimized dynamic seed inventory management system by integrating backend database systems with frontend UI/UX frameworks using VBA and Power Automate flows.
- Designed and built automated notification systems to enhance communication between plant breeders and customers, ensuring timely updates and increasing efficiency by reducing manual notifications by up to 90%.
- Analyzed trends in the seed orders system and implemented daily data refreshes to visualize findings in Power BI dashboards, facilitating data-driven decision-making.
- Designed and programmed a data transfer API to facilitate the seamless flow of high volumes of data from a data lake to SharePoint lists using C# and .NET.

Application Development Intern, IdRamp, Iowa, USA

June 2022 - August 2022

- Developed a dynamic, responsive web application for an event hosting website using C#, JavaScript, HTML, and Bootstrap.
- Optimized the user interface for mobile devices, reducing page load time by 11%.

Software Developer (Full Stack), Tata Consultancy Services, Chennai, India

July 2018 - July 2021

- Implemented scalable and robust e-commerce solutions using Oracle Commerce Cloud, Knockout.js, Node.js for Zebra Technologies.
- Developed user-friendly functionalities, including a quick cart feature, which decreased the average order placement time by 25%.
- Created REST APIs and webhooks using Node.js to enable seamless data transfer and integration between Oracle Commerce Cloud, order management systems, in-house payment systems, and ERP systems.
- Key contributor in providing post-production on-call support for the project.

Software Developer (Full Stack), Excelencia, Chennai, India

May 2020 - October 2020

- Developed scalable B2C e-commerce solution using Oracle Commerce Cloud, Knockout.js for Pierce Washington.
- Created product details page leveraging HTML5, CSS3, and JavaScript, which resulted in a 18% increase in user engagement and significantly enhanced the page's appeal to customers.

PROJECTS

Othello game, Reinforcement Learning

- Implemented Othello playing agents using reinforcement learning algorithms Q-learning and SARSA.
- Trained model for 2,00,000 training episodes to gain a 80% winning ratio.

House Price Prediction, Machine Learning

- Pre-processed dataset (handling outliers, data normalization) and implemented Linear Regressor, XGBoost, Gradient Boosting Regressor and Random Forest machine learning models to predict house prices.
- Identified performance improvement parameters to improve accuracy to 88%.

Pattern Mining using Apriori Algorithm, Data Mining

- Implemented Apriori algorithm on COVID-19 dataset to mine frequent itemsets.
- Pre-processed data to perform dimensionality reduction.

Sentiment Analysis, Data Analytics

- Extracted tweets from X (Twitter) using publicly available APIs. Classified tweets into positive or negative sentiments.
